Education

Pharma MBA (in progress)
Goethe Business School, Goethe University Frankfurt
2025–2027

Clinical Residency, Psychiatry
Moscow Research Institute of Psychiatry
2010–2012

Medical Doctor (MD), Medicine
Sechenov Moscow Medical University
2004–2010

Therapeutic Areas

- **Liver & metabolic:** Wilson disease (Ph I, III)
- **Neurology & psychiatry:** schizophrenia, narcolepsy, stroke (Ph III); Alzheimer's disease (Ph I)
- **Immunology & haematology:** SLE (Ph II, CAR-T), PNH (Ph III), RA (Ph IV)
- **Dermatology:** plaque psoriasis (Ph IV)
- **Infectious disease:** HIV (Ph IV)

PROFESSIONAL SUMMARY

Physician (MD, psychiatry residency) with 14 years in clinical research at sponsors (Alexion, AbbVie, Miltenyi Biomedicine) and CROs (IQVIA, Quintiles). Phase I–IV experience spans rare disease (Wilson disease, a metabolic liver disease, in Phase I and III; PNH), CNS (schizophrenia, narcolepsy, Alzheimer's disease, stroke), CAR-T cell therapy in SLE and real-world evidence in HIV, RA and psoriasis.

Brings clinical judgement where study design meets execution: eligibility and protocol burden, diagnostic pathways, lab-data integrity and health-authority responses — the levers behind screen-failure rates and data quality in biopsy- and biomarker-driven indications such as MASH. Pharma MBA candidate, Goethe Business School.

PROFESSIONAL EXPERIENCE

Miltenyi Biomedicine
Clinical Trial Manager — 02/2026 – Present

Cell therapy · CAR-T (ATMP) · Phase II · Systemic lupus erythematosus

- **Trial leadership:** operational and budget lead for complex CAR-T (ATMP) clinical trials; lead and mentor the cross-functional study team.
- **Innovation:** led GenAI programme design for Global Clinical Research (27 staff), from platform consolidation to staged Copilot enablement.

IQVIA
Clinical Trial Lead — 06/2021 – 01/2026

Phase I–III · Wilson disease · Schizophrenia · Narcolepsy · Alzheimer's

- **Protocol optimisation:** identified a caffeine restriction as a critical protocol barrier; operational and cultural risk data led the medical team to remove it, securing a top-enrolling site.
- **Lab-data integrity:** traced excess haemolysed central-lab samples to pre-analytical handling (centrifugation, transit temperature), an artefact that distorts safety labs such as potassium and AST; the fix restored data quality and averted a projected 18% budget overrun.
- **Health-authority responses:** led a team on high-risk EU CTR RFIs from France and Spain; a cross-country consistency matrix ensured timely, non-conflicting responses and study approval.
- **Quality & continuity:** sponsor audit closed in 3 days with zero major/minor findings; when war broke out in Ukraine, secured sponsor approval within 24 h and moved all original ISFs from Kyiv to Poland with zero data loss.

Alexion Pharmaceuticals
CRO Oversight Lead — 02/2020 – 05/2021

Rare disease · Phase III · Wilson disease (metabolic liver disease) · PNH

- **Eligibility diagnostics:** resolved a study-critical gap by securing the only eligible diagnostic facility in the country and leading logistics and contracts for 3,000 km patient travel; first patient enrolled globally.
- **TMF quality:** introduced a weekly scorecard and accountability calls, raising completeness to 97% ahead of schedule; passed a pre-inspection QA review.

Core Skills

Clinical science

- Protocol & eligibility optimisation
- Feasibility & diagnostic pathways
- Lab-data integrity & root-cause analysis
- RWE: non-interventional & registry studies

Regulatory & quality

- EU CTR / CTIS
- ICH E6(R3), ICH E8(R1)
- Inspection readiness, TMF

Data & analytics

- R, Tableau
- Google Data Analytics

Leadership

- Cross-functional & CRO oversight
- Risk-based management

Languages

English — Full professional

German — B1 (Goethe-Zertifikat)

Russian — Native

Certifications

- Design and Interpretation of Clinical Trials
- Project Management Professional (PMP)
- PRINCE2 Agile™ Practitioner
- Goethe-Zertifikat B1 (Zertifikat Deutsch)
- Google Data Analytics Professional Certificate

PROFESSIONAL EXPERIENCE (CONTINUED)

Career Break 09/2019 – 01/2020
Professional Development & Advanced Studies

Smooth Drug Development 09/2018 – 08/2019
Clinical Project Manager

Neurology · Phase III · Stroke

- **Regulatory problem-solving:** overcame a regulatory roadblock in Kazakhstan by sourcing and contracting a local freelance CRA to manage the evolving submission process, avoiding a major study delay.

AbbVie 07/2016 – 08/2018
RWE Study Lead

Real-world evidence · Phase IV · HIV · Rheumatoid arthritis · Psoriasis

- **Evidence generation:** led non-interventional and registry-based studies, including a multi-center study of transmitted HIV-1 drug resistance (n = 195, three Russian regions; co-authored EACS 2017 poster) and a registry-based study in psoriatic disease.
- **Scientific alignment:** aligned Medical, Biostatistics and Marketing on a unified data narrative for a large epidemiological study publication, used to present the product's advantages to government stakeholders.
- **Data quality:** turned around an underperforming data-management CRO with a remediation plan and new SLAs; all interim database milestones met.
- **Study performance:** introduced a vendor-hosted study dashboard and R/Y/G site-health reviews, cutting start-up by 3 weeks and late deliverables by 35%.

Quintiles 09/2012 – 07/2016
Clinical Research Associate / Senior CRA

- Site monitoring and source data verification; promoted to Senior CRA in 04/2015.

PUBLICATIONS & PRESENTATIONS

- *Transmitted HIV-1 Drug Resistance Analysis in Three Administrative Regions of the Russian Federation: A Multi-Center, Cross-Sectional Epidemiological Study.* Ladnaya NN, Gusev DA, … Potapov A, **Anikin A**, Kruglova AI. Poster PE6/15, 16th European AIDS Conference, Milan, 2017.
- *The Fallible Collaborator: Reconciling Human Tolerance of AI Errors versus Human Errors in Decision-making Systems.* SSRN preprint, July 2026.
- *The Inner Game of Hybrid Intelligence: A Mathematical Framework for Overcoming Mirage and Friction in Human-AI Teams.* SSRN preprint, July 2026.
- **Chair and speaker,** Global Clinical Trial Supply Forum 2026, Frankfurt (21–22 October 2026): “Market Pressures for Cost-Effective and Scalable Clinical Trial Operations”.
- **Author,** MadPharma (madpharma.de): long-form analyses of drug-safety failures and their regulatory lessons.
